

Here's why we joined the WAVES!

Read why women like yourself are enlisting by the thousands to serve their country in important Navy jobs

THE NAVY NEEDS WOMEN To Help Keep Fighting Ships Afloat

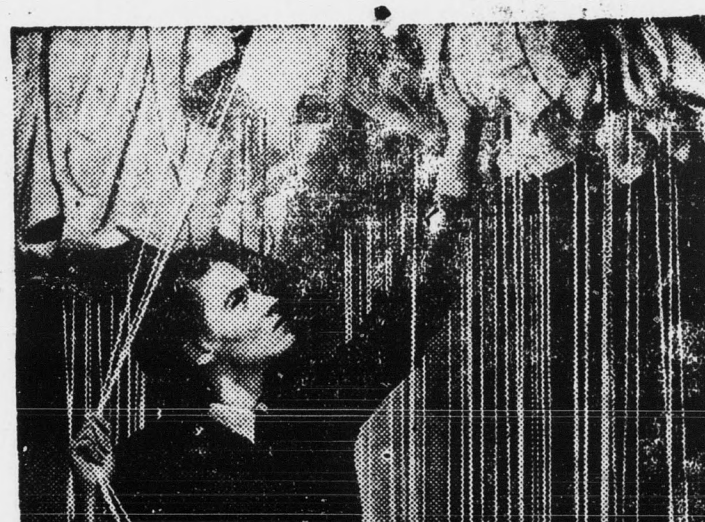

TODAY, the Navy is offering patriotic young women the greatest opportunity they have ever had to serve their country. Today, the Navy needs their services as never before... to release trained Navy men for sea duty by taking over jobs at shore bases. If you are a young woman between 20 and 35, with as much as two years of high school or business school, you are eligible for enlistment. The pay is excellent. The work is thrilling. The need is URGENT. The whole exciting story of service in the WAVES is told in a free 30-page, illustrated booklet, "How to Serve Your Country in the WAVES".... which you can secure at any Navy Recruiting Station. If it is not convenient for you to visit a Navy Recruiting Station, simply clip and mail the coupon at right below, and a copy of the book will be mailed to you immediately.

"YOU CAN'T BEAT THE TRAINING you get in the WAVES! One to four months in college surroundings. Comfortable rooms in a dormitory. Good food—all paid for by the Navy! And the finest training in the world. Typing, radio, communications, mechanics—Navy instructors make you an expert in any of a dozen different jobs."

"FOR INSTANCE, MY ROOMMATE at training school has a fascinating post in Naval Communications. One of her duties is to check the position of our ships by means of charts. As she wrote me recently, 'I not only have the satisfaction of doing my part to help win the war. In my job with the WAVES, I can see how we're winning it.'"

"I HAD NO SPECIAL experience. Never held a job before. But I qualified to learn Parachute Repair work at a Navy air base. It's interesting work, and with Navy training I'll rate a good job after the war. Meanwhile, I'm proud the man I replaced is helping to win it by fighting at sea."

Record of Va. Auto Drivers Convictions

Report 3,095 Convictions For Drunk Driving; 2,781 Lost Permits

Richmond, July 21. There are 91,000 fewer licensed automobile drivers in Virginia this year than last, according to figures just released by Crawford F. Joyner, Jr., state commissioner of motor vehicles. The total number of licensed drivers in the state is now 760,683, which includes 324,344 operators and chauffeurs licenses issued during the fiscal year which ended June 30th. Operators of passenger cars accounted for 724,646 of the driving permits and 36,037 were for chauffeurs.

Mr. Joyner attributed the decrease in licenses to many causes but mainly to the large numbers of persons from Virginia now in the armed services, the pleasure driving ban, removals from the state, etc.

Mr. Joyner also reported that the Motor Vehicles Division had refused to renew permits for 888 persons because of criminal records of the applicants, and in this connection he added that a new or file is now being set up which will contain a complete record of every person who has been convicted one or more times of law violations since 1932.

For drunken driving, 2,781 persons last year were fined for careless and reckless driving, 522, and for failing to maintain proof of responsibility, 582. Other convictions were for hit-and-run, men's laughter, and for convictions of other felonies.

During the past year a total of 2,555 convictions were recorded by the division, including 41,640 for speeding, 11,237 for reckless driving, 289 for hit and run, 3,995 for drunk driving and 16,122 for other traffic law violations.

Of the total number of convictions, 71,474 were in Virginia and 1,885 were reported from other states.

Largest Service Flag

The largest service flag in the country, honoring 2,119 employees, is in the hands of Marshall Field & Co. department store, Chicago. This huge banner measures 2,400 square feet and weighs 500 pounds. Sixty-one stars represent members of the auxiliary services. A cluster of seven gold stars commemorates the dead.

Conservation On The Farm

One of a series of articles about what Appomattox farmers are doing.

Strip cropping, better pastures, meadow strips, and wild life borders are being used by S. Tilden of Stonewall, to improve his farm.

Last fall Mr. Lee decided to change the arrangement of his crop land and work his crops in contour strips. He is highly pleased with it, and says that the crops are easier to work and the hay can be hauled from the field easier. He has established three meadow strips to carry off any excess water from the field and to insure a good quantity of hay.

Local Soldier Stationed on Guadalcanal

Special to Times-Virginian

Passed by Censor

Excellent and reliable work in the field under the very recent promotion of Martin L. Webb, son of Mrs. John W. Webb and the late Mr. Webb, of Route 1, Appomattox, from private first class to Corporal. Cpl. Webb, at present stationed on Guadalcanal Island, is now second in command of his squad.

Webb claims the distinction of never having seen an old friend anywhere whom he knew previously during all the time he has been in the Army since January, 1912. He is the lone man in his company hailing from Appomattox, although
